

At **Rapp OptoElectronic GmbH** we have been developing and manufacturing scientific instrumentation for many years. Typical applications: flash photolysis, fluorescence excitation, illumination, photo stimulation, uncaging, ablation, velocity measurements, laser temperature jump and UV microscopy.

We have a long term experience in academic research which was the basis for the specifications of many of our systems. This brings us into a strong position to provide technical expertise and advice for non-standard needs. To enforce our team at our branch Wedel near Hamburg, Germany, we have an **opening** for a

BIOLOGIST / BIOPHYSICIST / PHYSICIST (m/f)

Job description:

- Analyze the requirements of our clients (mostly scientists) regarding technical and scientific aspects.
- Advise our customers the most suitable solution for their applications.
- Stay in close contact to customers and colleagues to advance the development of innovative products.
- Visit laboratories of clients for demonstrations and installations (world wide).
- Evaluate and document test results in cooperation with our clients.
- Travel world wide to attend exhibitions.

Your qualification:

- degree in biology, physics or biophysics
- profound knowledge in optics, microscopy, physical techniques
- advisory skills, customer orientation
- good command of English
- communicative, flexible, team player
